HYDROSTATIC HEAD RATING

A hydrostatic head rating is a measure of how waterproof a certain fabric is; this indicates the amount of pressure the material can withstand before it starts to leak through. This test is measured in millimetres (MM), which refers to the height of a column of water that the fabric can resist.

In the UK, waterproof workwear must comply with the BS EN 343 standard, which ensures the safety of workers exposed to rain by addressing both water penetration resistance and breathability.

Class	Waterproof rating (mmH2O)	Performance
Class 2	> 800MM	Basic water resistance
Class 3	> 8,000MM	Medium waterproof
Class 4	> 13,000MM	Highly waterproof

STORAGE

Always store in clean, dry conditions.
Do NOT store in places subject to direct, strong sunlight.

DISPOSAL

Please dispose of this garment in a responsible safe manner.

AFTERCARE

The washing instructions relate to the Retro Reflective Tape performance and Chromaticity of the background after the stated number of washing cycles and not the waterproofness after washing.

Do not wash in biological powder

Machine wash warm or warm hand wash. Do not bleach. Do not iron. Do not dry clean. Do not tumble dry.

Cold rinses, short spin, do not wring.

The stated maximum number of cleaning cycles is not the only factor related to the lifetime of the garment. The lifetime will also depend on usage, care and storage. If damaged, do not repair.

RECOMMENDATIONS FOR WEARING TIME

Temperature of working environment °C	1 Ret above 40
25	60 minutes
20	75 minutes
15	100 minutes
10	240 minutes
5	no limit
