## RECYCLING SCHEME

**End-of-Life: What happens to hi-vis and workwear?**

Used textiles such as hi-vis and general workwear go through a structured recycling process to maximise material recovery.

- 1. De-trimming & Cutting**  
Zips, buttons, reflective strips and other non-textile components are removed.
- 2. Mechanical Shredding**  
Garments are mechanically torn, pulled and ground into smaller fibres.
- 3. Blending & Classification**  
Fibres are sorted based on length, composition and cleanliness.
- 4. Bagging & Storage**  
The processed fibres become WPF (Waste Processed Fibre), ready for reuse in downstream manufacturing.
