RECYCLING SCHEME

End-of-Life: What happens to hi-vis and workwear?

Used textiles such as hi-vis and general workwear go through a structured recycling process to maximise material recovery.

1. **De-trimming & Cutting**
   Zips, buttons, reflective strips and other non-textile components are removed.
2. **Mechanical Shredding**
   Garments are mechanically torn, pulled and ground into smaller fibres.
3. **Blending & Classification**
   Fibres are sorted based on length, composition and cleanliness.
4. **Bagging & Storage**
   The processed fibres become WPF (Waste Processed Fibre), ready for reuse in downstream manufacturing.
